Tung Thanh Le

Website: http://ttungl.github.io/ **U.S. Permanent Residency**

Education

- University of Louisiana at Lafayette, USA
 Doctor of Philosophy (Ph.D.) in Computer Science
 08/2013 12/2018
- Kumoh National Institute of Technology, South Korea Master of Engineering (M.Eng.) in IT Convergence Engineering 09/2011 – 08/2013
- Professional Work Experience

- University of Louisiana at Lafayette, USA
 Master of Science (M.Sc.) in Computer Science
 08/2013 12/2016
- Danang University of Technology, Vietnam
 Bachelor of Engineering (B.Eng.) in Electrical Engineering,
 08/2002 08/2007

Interest

Algorithmic Optimization, Mathematical Modeling, BigData

Mobile Phone: 612-490-3605

Personal Email: ttungl@gmail.com

Machine Learning, Deep Learning and Artificial Intelligence

- Lead ML Ops/Research Engineer Thomson Reuters 5/2023 Present
 - Ask Tax Talks: Built an Al-based (chat agent) end-to-end solution to address customers' challenges in reviewing tax datasets by leveraging large language models (LLMs) to answer specific questions based on their tax data. Implemented and deployed the solution on Google Cloud, utilizing Gemini Pro with a function calling approach to trigger specific actions to SQL queries and retrieve responses from Gemini, built user interface using Streamlit.
 - Hallucination Detector: Built a RAG-based end-to-end solution to detect hallucinated Al-generated text, leveraging embedding models, Milvus vector database for similarity search from user's query. Using OpenAI GPT-4 for generating answers and identifying potential hallucinations.
 - <u>DevOps:</u> Developed ML features, deploying and maintaining ML pipelines for internal services.
- Senior Manager, Data Scientist NBCUniversal 12/2021 4/2023
 - <u>Lift Measurements:</u> The goal is to measure the impact of advertising campaigns. Responsible for building ETL data pipelines with Python, PySpark, SQL on Databricks and SnowPark for data processing, feature engineering, feature selection, using matching methods such as propensity score matching for measuring the impact.
 - <u>Face Recognition:</u> The goal is to help data labeling on celebrity faces/brand objects in advertising video clips for conducting analysis on who contributed high sales/conversion rates in the advertising campaigns. Responsible for building an end-to-end solution, from data collection, **image processing**, to build and train **deep neural net** models with MTCNN, FaceNet, and **supervised learning SVM**. MTCNN is used to capture facial areas from inputs. Faces captured are used for training FaceNet. SVM is used to classify new faces based on Face Embedding from trained FaceNet model. Implemented on **AWS EC2**.
- Data Scientist J.D. POWER 07/2018 12/2021
 - <u>Days-to-turn on Vehicles Prediction</u>: The goal is to help the OEM/dealers planning to optimally re-stock their sales inventories based on days-to-turn prediction. Responsible for building EDA, ensemble models (i.e. LightGBM, XGBoost) with time series to predict days-to-turn target which determines how long it takes to sell a specific new car in the inventory. Implemented on AWS, databricks using Python, SQL, and Tableau and Streamlit for dashboards.
 - PIN Transformation: Building ETL big data pipelines from SAS to Python using BigQuery, PySpark, Python, Javascript for production on AWS, GCP platforms.
 - Online Social Review Analytics: The goal is to help evaluating the in-store performance rating based on the customers' reviews of the banks across U.S. Responsible for building the reviews sentiment analysis using natural language processing (NLP) techniques such as text cleaning, feature engineering using outlier remover, lemmatization, N-grams tokenization; Utilizing AWS Comprehend, SageMaker, Google Cloud NLP.
- Research Intern Hanwha Thales, S. Korea 08/30/2012 12/31/2012
 Responsible for optimizing the network topologies for ships' built-in-network communication
- Software Engineer Unilab-DUT (Novas Technologies Ltd.), Vietnam 04/01/2008 – 06/01/2011: Responsible for software-hardware development.
- Summer Intern Orion Tech., S. Korea 06/01/2012 08/30/2012
 Responsible for programming network communication in ships.
- PCB Layout& Design Engineer- Acronics Systems, Inc -San Jose, CA 06/01/2007 – 03/30/2008: Responsible for designing PCB

Projects

- Donation Analytics (Insight Data Engineering Challenge): Analyzed loyalty trends in campaign contributions for cash-strapped political candidates by identifying zip codes with repeat donors and calculating their spending patterns.
- Behavioral Cloning (Deep Learning): Built and trained a convolutional neural network using TensorFlow, Keras, and Nvidia architecture for autonomous driving in a simulator. Performed image processing and augmentation with OpenCV. Utilized dropout, Adam optimizer, and Udacity dataset. Trained model on AWS EC2.
- Advanced Lane Finding (Computer Vision): Built an advanced lane-finding algorithm using distortion correction, image rectification, color transforms, and gradient thresholding. Identified lane curvature and vehicle displacement. Overcame environmental challenges such as shadows and pavement changes. Detected highway lane lines on a video stream. Used OpenCV image analysis techniques to identify lines, including Hough Transforms and Canny edge detection.
- Network-on-Chip Optimization: Designed the mathematical modeling for optimizing interconnections and energy efficiency in network-on-chip. Used CPLEX, Gurobi solvers, Python (pyomo), Matlab (heuristic algorithms), and machine learning algorithms for solving this optimization problem.

Professional Certificates

- Generative Al with Large Language Models (2023)
 Online Course DeepLearning.Al
- Certification of Natural Language Processing Specialization (2021)
 Online Course DeepLearning.AI
- Honors & Awards
 - Graduate Teaching Assistantship, 09/2015 06/2018
 - NSF Graduate Research Fellowship, 09/2013 08/2015
 - Best Paper Award 14th Conference on Electronics & Info. Communications 2012
 - NIPA scholarship and NRF scholarship, South Korea, 09/2011 06/2013

- Certification of Machine Learning (2017)
 Online Course Stanford University
- Certification of Statistical Learning (2018)
 Online Course Stanford University
- Samsung Thales scholarship for student travel in 12/2012
- Excellent student, Danang University of Technology, 2004 –2007
- One of four honor students achieving highest score on graduation thesis (4/500) in 2007

Computer Skills

- Programming languages: Python, Java, PySpark, Scala, Rust, BigQuery, Javascripts, SQL, C/C++, R, MATLAB, CPLEX/AMPL.
- Frameworks/Libraries: Deep Graph Lib (Graph Neural Networks), Langchain, Databricks, Airflow, Tensorflow, Keras, Apache Spark, Snowflake, Snowpark, MLLib, Node.js, OpenCV, Scikit learn, PyTorch, Spacy, nltk, OpenAI, AWS products, H2O.ai and driverless AI platform, Trax by Google.
- Data Visualization: Tableau, Power Bl.
- Cloud Services: Amazon AWS, Google Cloud Platform, Azure Cloud.
